OxyMask™ ETCO₂ Quiz

Name: _______________________________  Title: ________________

Department: __________________________  Employee ID: _______

Employee’s Email: _____________________  Supervisor’s Email: ______________________

Hospital, Clinic, Company _____________  City: ________________

Province / State: ______________________  Country: _____________

1. What is the FiO₂ delivery capability of the OxyMask™ ETCO₂? (select one)
   a) 24% to 65%
   b) 65% to 90%
   c) 21% to 100%

2. At what flow rate can OxyMask™ ETCO₂ achieve its highest delivered oxygen? (select one)
   a) 6 LPM
   b) 8 LPM
   c) 15LPM

3. There are 3 sizes of OxyMask™ ETCO₂. (select one)
   a) True
   b) False

4. What are the clinical advantages of OxyMask™ ETCO₂? (select one)
   a) The open system is less claustrophobic and more comfortable
   b) Oxygen titration is simple by adjusting the flow meter up or down
   c) Access to the patient for special procedures
   d) All the above

5. The OxyMask™ ETCO₂ is available with different luer connections and tubing lengths. (select one)
   a) True
   b) False

6. How do you titrate oxygen delivery with the OxyMask ETCO₂? (select one)
   a) Replace the colored Venturi Jets to the specific FiO₂ required
   b) Adjust Flow Rate up or down to maintain required SpO₂
   c) You can’t, you must change to another mask
