Comparison of the OxyMask and Venturi mask in the delivery of supplemental oxygen: Pilot study in oxygen-dependent patients

Jaime M Beecroft BSc, Patrick J Hanly MD FRCP ABMA

"Oxygen is delivered safely and more efficiently by the OxyMask than by the Venturi mask in stable oxygen-dependent patients."

"The OxyMask... delivering high concentrations of oxygen at a relatively low flow. We hypothesized that this system delivers oxygen more efficiently & more comfortably than the conventional Venturi mask."

"OxyMask" was quiet, light, (and) it fit better, was less humid and less intrusive than the Venturi mask.

OxyMask
